TCxFlight

Point of Commerce Solution

TCxFlight POINT OF COMMERCE SOLUTION

Elegant Design Extends Traditional Options

- › Traditional fixed function capabilities
- › Variety of solutions to core requirements
- › Small footprint with multi-touch display
- › Intuitive, quick-to-learn touch technology maximizes associate productivity

On Demand Mobility

- › Push button responsiveness to planned or unexpected daily variation
- › Powerful function that is locked and docked for ready use

Future Adaptability

- › Adjust to tomorrow's changing mobile needs
- › Adaptive, durable, and designed to grow with retailer and protect their investment

The new TCxFlight Point of Commerce Solution brings a new wave of options to retailers. Designed to address retailer's immediate, mission critical point of sale operations, the TCxFlight is an elegant POS, a small customer kiosk, and even a great store manager's workstation. But its real power comes with its ability to take everything mobile and thereby enable retailers to utilize the versatility of this hybrid solution in a variety of mobile use cases.

While mobility is an important element of TCxFlight, even more powerful is its immediate availability. The mobile unit can be locked and docked right where it can be used in one of several primary, traditional roles. In this way, not only can the mobile unit always be secured, but whenever required for mobile use, no time is lost locating and retrieving a given, special purpose mobile device. This versatile solution helps to consolidate equipment and save both money and time with the touch of a button.

The new TCxFlight features a solid base that provides a platform for secure storage, charging, and communications whenever the mobile unit is docked. This base features (4) standard PC USB ports, (2) 12V USB ports, and (1) 24V port, along with an Ethernet port for wired network and LAN communications. All cable connections are secured behind a unique back panel to prevent accidental or unauthorized disconnections.

An Innovative Hybrid Solution for
Today's Traditional and Mobile
Retailing Needs

Toshiba TCxFlight is a traditional solution to today's core retail requirements. With its elegant design, TCxFlight offers an extension of the Toshiba Global Commerce Solutions portfolio and provides retailers a consistent look and feel across their store.

■ Shown: TCxFlight Point of Commerce Solution with Base Feature

Mobile devices are of limited value unless they are available when required. Too often, this is not the case with single purpose mobile devices that are locked away when not in use. TCxFlight is reconfigurable on demand with the simple push of a button. Shown below, the mobile unit can be locked and docked with an optional base unit. Used in this way, the mobile unit can be secured right where it is used in any number of primary traditional roles.

■ Shown: TCxFlight Separation

■ Shown: Back view of TCxFlight with Base Feature and Integrated MSR

The TCxFlight enables traditional or mobile solutions for today's retailers with the power and performance packaged in a rugged design. All of the logic is contained in the mobile unit.

■ Shown: Mobile unit with no base and integrated MSR (front)

■ Shown: Mobile unit only, right side

Optional base unit can be configured with one or several mobile units in order to accommodate a variety of store layouts. The connector is designed for years of use in the rugged retail environment, which includes docking and undocking with any available base throughout the day.

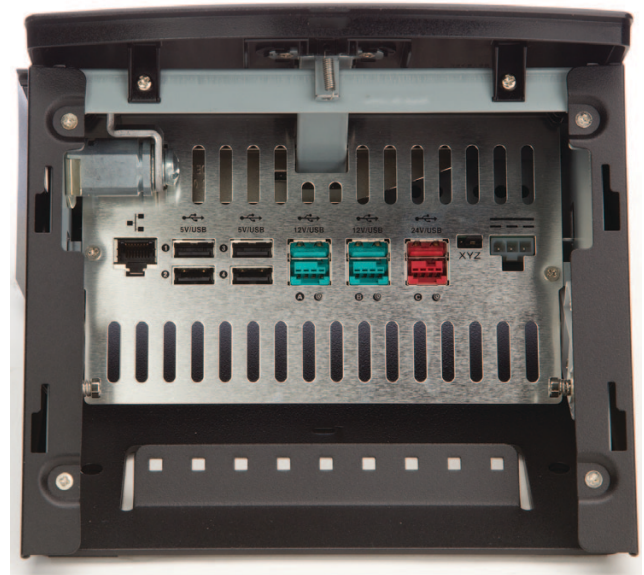

■ Shown: Base only (front)

All cable connections are secured behind a unique back panel. The panel cannot be removed unless the mobile unit is unlocked, and undocked.

■ Shown: Back cover removal

In addition to security, the base option provides power and additional communications anytime a mobile unit is docked. The instant it is docked, that mobile unit is automatically recharging, connected to wired Ethernet, and connected with up to seven (7) USB devices.

■ Shown: Base Ports

SPECIFICATIONS

Hardware	
Processor	Intel Celeron ULV 847 (21X Models), Intel ULV i5-3439Y (25X Models)
Solid State Drive (Standard)	mSATA 128 GB SSD
System memory	2 GB DDR3 1600 MHz (21X Models), 4 GB DDR3, 1600 MHz (25X Models)
